

SOPHOS

simple + secure

Endpoint Protection— Enterprise

Complete security that includes encryption,
web protection and patch assessment

We give you everything you need to stop malware and protect your data in one console and agent. Get fast, effective and complete security for your users, wherever they are. We make it easy to install, manage and use—saving you time and money. And, it's all one license along with unlimited 24/7 support, free security updates, software upgrades, home use and more without stretching your budget.

Key benefits

- ▶ Proven protection that automatically identifies new malware threats and cleans them up
- ▶ One agent scans for viruses and controls applications, devices, data and web access too
- ▶ We deliver more protection with less impact on your users—our scanning is now 15% faster than our last major upgrade. **See how AV-Comparatives rates our performance**
- ▶ Everything we deliver is easily managed by one console, including patch assessment and disk encryption. Enx TestLab says we save you time
- ▶ We are always here for you. From our SophosLabs analysts who monitor and fine tune detection rules, to our 24/7 certified expert support

Protect Windows, Mac, Linux, UNIX and virtualized platforms—all from one console.

Block threats, not productivity

We make it easy for you to keep your users safe without getting in the way of their work. Our fast scanning engine takes care of everything, and it's now up to 15% faster than our last major upgrade.

Uses live, cloud-based protection to check suspicious files against our database, stopping malware before it can run.

Identify new threats, clean them up and minimize the number of false positives using our practical host intrusion prevention system (HIPS).

We put web malware scanning and inappropriate site filtering in our Endpoint agent. This gives you web protection anywhere while reducing your web gateway costs.

Be confident that you're secure. Our Patch Assessment identifies, prioritizes and scans for critical threat-related security patches.

We don't scan files that haven't changed, and we monitor your users CPU usage so that our scans only use the resources they need and don't slow your users down.

We make sure that all computers allowed to connect to your network meet your security policies.

Our integrated full-disk encryption delivers faster initial encryption and 30% faster accelerated ongoing encryption. Your users get quicker access to the data they need.

Prevent data loss

With data control, integrated full-disk encryption and encryption of data on removable storage devices, you'll make sure only the right people have access to sensitive information.

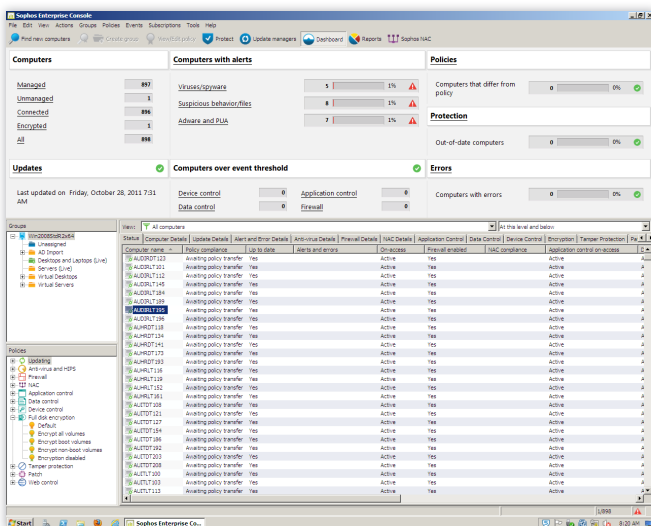

Secure data on your computers by encrypting the entire hard drive, and by encrypting files saved to removable storage and shared through emails.

We monitor the transfer of sensitive data to removable storage devices and web-enabled applications.

Save time creating your own data control lists. We supply an extensive library of prepackaged data definitions of sensitive and personally identifiable information (PII).

You can set policies controlling which removable devices and network interfaces people can use.

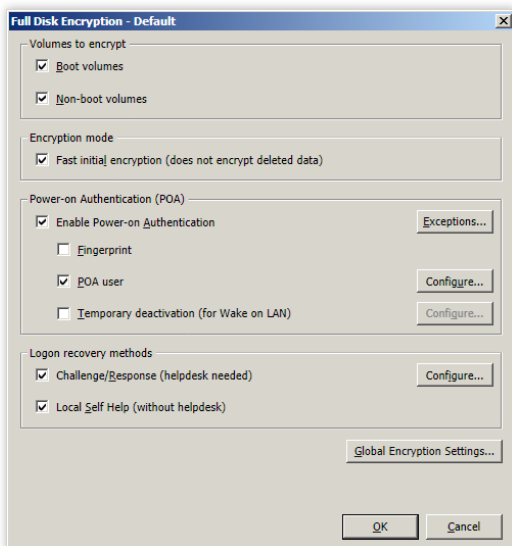

We provide application control lists you can use to easily block installation and use of unwanted applications that can lead to data loss.

Try it now for free

Manage full-disk encryption from the same console you use to manage your antivirus.

Free up your time

Setting up the security you need is easy, and maintaining your protection takes practically no time at all. And, we make switching security vendors easy too:

Gain access to an easy to use installation wizard with a built-in removal tool that automatically removes your current antivirus.

We make it easy to find computers and deploy antivirus. We even give you a choice of methods, including our Active Directory integration.

A single dashboard lets you see endpoint protection status, events and actions across all supported platforms.

Create a security policy once and then deploy it across multiple groups.

Protect new computers on your network automatically through Active Directory synchronization.

Disinfect users' computers quickly from our central console.

Role-based administration allows you to share and delegate responsibility for actions, such as cleaning up infections.

You can configure and schedule reports so everyone gets the information they need, when they need it.

Software components

Enterprise Console

A single, automated console for Windows, Mac, UNIX, Linux and virtualized platforms centrally deploys and manages antivirus and client firewall protection; intrusion prevention; endpoint web protection; patch assessment; encryption; data, device and application control; and endpoint assessment and control.

Endpoint Security (antivirus, HIPS, device control, application control, DLP)

A single endpoint agent for Windows that detects viruses, spyware and adware, rootkits and suspicious files and behavior. It monitors the transfer of sensitive data off the network and blocks malicious and inappropriate websites. The agent also controls use of removable storage devices and unauthorized applications across multiple platforms.

Client Firewall

A centrally managed client firewall designed for the enterprise environment blocks worms, stops hackers and prevents intrusions.

NAC

A Network Access Control (NAC) solution assesses managed, unmanaged and unauthorized computers. NAC detects configuration issues, such as out-of-date antivirus protection or a disabled firewall and fixes issues before allowing access.

Mobile Security

Antivirus and anti-spyware protect Windows Mobile smartphones and PDAs.

Anti-Virus for Mac, Linux, UNIX, NetWare, OpenVMS

Antivirus protection for Mac, Linux and UNIX, NetWare and OpenVMS computers.

Sophos PureMessage for Microsoft Exchange

Antivirus and anti-spam protection for Microsoft Exchange servers.

Sophos for SharePoint

Antivirus protection for Microsoft SharePoint servers, password and machine recovery tools.

Sophos Data Protection Add-on

Integrated full-disk encryption includes secure pre-boot authentication and a full set of password and machine recovery tools.

Sophos Patch Assessment Add-on

Scans and identifies computers missing critical patches for vulnerabilities commonly targeted by threats.

Sophos Endpoint Web Protection Add-on

Web policy enforcement for inappropriate sites.

Endpoint Protection

Platforms Supported

Sophos Anti-Virus

- ▶ Windows
Windows 7/Vista/XP Home SP1a and above/Pro SP1a and above/2000 and 2000 Pro SP3 and above/95/98/Windows XPe/Windows Netbooks/Windows Embedded Standard/WePOS/Mobile/Server 2003/2003 R2/Server 2008 incl. Core/2008 R2 incl. Core
- ▶ VMware
VMware 4.x/vSphere 4/ESX 3.5/Workstation 6.5/7.0 Server 2.0
- ▶ Microsoft Hyper-V Server 2008
- ▶ Citrix XenServer 5.0/5.5/5.6
- ▶ Non-Windows platforms
Mac OS X/Linux/UNIX/NetApp Storage Systems/EMC/OpenVMS/NetWare

Sophos NAC

- ▶ Windows
Windows 7/Vista/XP Pro SP1 and above/2000/Server 2003/2003 R2/Server 2008/2008 R2

Sophos Client Firewall

- ▶ Windows
Windows 7/Vista/XP Home SP1a+ and Pro SP1a+/2000 Pro SP3+

Enterprise Console

Management server

- ▶ Windows 7 (incl. XP mode)/Server 2008/2008 R2/Server 2003/2003 R2
- ▶ VMware
VMware 4.x/vSphere 4/ESX 3.5/Workstation 6.5/7.0 Server 2.0
- ▶ Microsoft Hyper-V 6.0 and Server 2008
- ▶ Citrix XenServer 5.0/5.5/5.6

Remote Console

- ▶ Windows 7 (incl. XP mode)/Server 2008/2008 R2/Server 2003/2003 R2/Vista/XP Pro
- ▶ VMware
VMware 4.x/vSphere 4/ESX 3.5/Workstation 6.5/7.0 Server 2.0
- ▶ Microsoft Hyper-V 6.0 and Server 2008
- ▶ Citrix XenServer 5.0/5.5/5.6

Platforms managed

- ▶ Windows 7/Vista/XP/2000/Server 2008* incl. Core/Server 2003
- ▶ Mac OS X Versions 10.4/10.5/10.6
- ▶ Linux**
- ▶ UNIX**

SafeGuard Disk Encryption

- ▶ Windows
Windows 7/Vista/XP Home and Pro
- ▶ Mac
OS X 10.5.x, 10.6.x (EFI 64-bit only)

SafeGuard PrivateCrypto

- ▶ Windows
Windows 7/Vista/XP Home SP2+ and Pro SP2 +/2000 SP4+

Languages Supported

- ▶ English, French, German, Italian, Japanese, Spanish, Simplified and Traditional Chinese. However, not all language support is available on all platforms.

Note: For our encryption components, language support is English, French, Japanese, Spanish, Italian and German.

* Including AMD64 and Itanium 64-bit versions
