

Sophos Protection for Windows Mobile

Included in our Endpoint Protection

Sophos Protection for Windows Mobile, part of Endpoint Protection, protects Windows Mobile devices, such as PDAs and smartphones, and the networks they connect to. It detects and disinfects mobile viruses and spyware, securing sensitive information. Helps you maintain uninterrupted business continuity, communication and reputation in an environment where mobile devices are increasingly targeted.

Key benefits

- › Detects and disinfects mobile viruses and spyware
- › Blocks unknown threats before they cause damage, with Behavioral Genotype Protection
- › Extends security to vulnerable mobile devices
- › Removes the risk of losing critical and confidential data through malware infections
- › Ensures employee productivity by keeping mobile devices stable and secure
- › Allows administrators to lock down settings prior to installation
- › Enables consistent company-wide security that end users cannot circumvent
- › Informs users and remote administrators of malware incidents via on-screen and email alerts
- › Allows on-access, on-demand or scheduled scanning with minimal impact on performance
- › Provides instant reporting on update status via an intuitive graphical interface
- › Updates automatically with the latest protection from SophosLabs, a global network of threat analysis centers
- › Includes 24/7 **certified expert support**. Contact us anytime for one-to-one assistance

Comprehensive, proactive protection

Prevents infection Sophos Mobile Security detects and disinfects malware on your Windows Mobile devices. Prevents infection for MMS, SMS, email, instant message attachments, Wi-Fi, internet downloads and Bluetooth transfers.

Multiple OS coverage Gain protection from Windows Mobile and Symbian OS malware.

Maintains peak performance Get on-access, on-demand or scheduled scanning of files. Scan inside your archives and detect and quarantine malware. Do it with minimal impact on your performance or system resources.

Prevents intrusion Behavioral Genotype Protection scans for specific behaviors and characteristics. Detects new threats before code begins to execute.

Sophos Protection for Windows Mobile detects and disinfects mobile viruses and spyware, securing sensitive information.

Easy to use, with automatic updates

Intuitive menus The easy-to-use graphical interface provides you with instant reports on update status using a menu and task bar icons.

Automated alerts Receive notifications of malware incidents via on-screen and email alerts. Remote administrators also receive email alerts, making sure that any threats are easily monitored and neutralized.

Updated protection Options support scheduled and on-demand updates of software and malware signature files. Get the latest updates from SophosLabs—our global network of threat analysis centers.

Flexible update methods Downloaded updates come directly from SophosLabs over GPRS, ActiveSync or a wireless connection.

Keeps you mobile Keep the benefits of mobile connectivity. Maintain remote email access, with the reassurance that all your sensitive business information remains secure.

Central deployment, configuration and lock down

Secure and consistent Administrators can lock down settings prior to installation. This allows you to provide a consistent security policy across all mobile devices.

Individual or group deployment Protection can deploy directly or as a group. Set individual devices via Microsoft ActiveSync, or multiple devices using management software, such as Intellisync Mobile Suite.

Sophisticated logging Restrict impact on memory consumption using a configurable log file size. Export and email options allow for the extraction of logs from devices for analysis.

Isolates viruses Store detected viruses in a quarantine on the mobile device. Administrators can exclude files or directories from scanning.

Licensing

Sophos Protection for Microsoft Mobile is included in Endpoint Protection—Enterprise and Endpoint Protection—Advanced licenses. [Compare](#).

Industry-leading expertise 24/7

Always supported Our 24/7 in-house customer support operation is always available to you. While SophosLabs—our global network of threat analysis centers—provides a rapid response to emerging and evolving threats.
