

WHAT'S NEW | Web Security and Control

Introducing New Enterprise Capabilities

We've just made web protection more scalable
and flexible than ever.

WS5000 Flagship Web Appliance

- ▶ Triple the performance and capacity of the WS1100
- ▶ Protects over 3000 users from the latest web threats
- ▶ Great value for large and growing organizations

Role-Based Administration

- ▶ Five built-in roles for delegating management tasks
- ▶ Limit reporting access by department, groups or individuals
- ▶ Keep it simple with the new administrator account wizard

WS5000 Flagship Web Appliance

A New Level of Performance

The WS5000 packs **state-of-the art processing power** with more than three times the performance of the WS1100

Protect 3000 users from the latest web threats. We scan all web traffic for threats without added latency.

Massive on-box storage enables 3 years of reporting and log data retention for all your users.

Great Value

It's over three times the performance, but not three times the price. If you're protecting a large group of users, our WS5000 delivers great value.

And don't forget **all our appliances come with our managed appliance service** which includes remote monitoring and alerting, remote remediation and free updates and upgrades for the term of your license.

The new WS5000 sets a new standard for high-performance web security and control.

Role-Based Administration

Five Essential Roles to Manage the Day to Day

Helpdesk – Approve user submissions, test policies, and verify connectivity

Policy – Configure and test global and group web browsing policies

Reporting – View or schedule reports

User Activity – Access detailed web activity data for forensics investigations

Full Access – Full access to all configuration and reporting capabilities

Combine roles or divide them as you see fit, providing your team with the just the privileges they need.

New reporting groups further divide responsibility amongst your reporting and user activity roles. Their visibility is strictly limited to the individuals within their group.

Role-Based Administration Made Easy

Our configuration wizards make administrator accounts easy to manage.

Define a new administrator account, assign a role and limit reporting oversight in just a few steps.

New administrator account wizard lets you assign roles to your team in a few easy steps.
