

Sophos is a world leader in IT security and data protection. We offer organizations complete protection and control – defending against known and unknown malware, spyware, intrusions, unwanted applications, spam, policy abuse and data leakage, and providing comprehensive network access control (NAC). Our reliably engineered, easy-to-operate products protect over 100 million users in more than 150 countries. Our vision, commitment to research and development, and rigorous attention to quality have enabled us to maintain strong year-on-year growth and the highest levels of customer satisfaction in the industry.

Simplifying protection

Our powerful, expertly engineered technologies proactively protect you from malware and data loss, keeping your network and information secure while giving you the flexibility and network access you need to succeed in today's 24/7 business environment. Backed up by enterprise-focused, round-the-clock technical support, our solutions simplify security and free you up to concentrate on business.

Trusted security expertise

With 20 years' experience and worldwide visibility of emerging threats, SophosLabs™ – our global network of threat research centers – analyzes web and email traffic 24 hours a day to secure and protect against any new virus, spyware, spam, or web-based threat anywhere in the world, irrespective of origin.

Global presence

Sophos has offices worldwide and our products are sold through a network of subsidiaries and partners. Our technologies power leading third-party security solutions and our round-the-clock vigilance has led to rapid international growth, an expanding user base and continuous profitability.

Committed employees

At our heart is a team of skilled product developers, programmers, and technical support staff. Along with sales, marketing, and administration staff, they are committed to providing customers with unrivaled expertise, service, and support, enabling your business to flourish.

SophosLabs – responding quicker to virus outbreaks than any of our major competitors.

Sophos Security and Data Protection

Sophos Security and Data Protection provides complete protection across endpoint, email and web in a single solution. It enables you to proactively protect against all new and unknown threats and secure your data against accidental or malicious loss. Support is provided 24x7x365 as standard, ensuring you are constantly protected.

Endpoint Security and Data Protection

Simplified cross-platform security, centralized management, full data encryption and flexible control of devices, applications and network access ensuring your data is secured against infection and loss and complies with government/industry regulations.

Email Security and Data Protection

Managed email security appliances and protection for Exchange, UNIX and Notes servers, providing unique integration of anti-virus, anti-spam, anti-phishing and policy enforcement capabilities to secure and control email content.

Web Security and Control

The first managed appliance to proactively ensure safe web browsing, blocking suspicious URLs, hijacked or infected websites, and download of spyware, viruses, malware and unwanted content.

Sophos NAC Advanced*

Enables company-wide compliance with your internal policies, and helps you to meet industry and government regulations. Controls network access, protects data, and ensures that all computers have up-to-date security software and patches.
