Alternative deployment option – Sophos for Virtual Environments

Sophos for Virtual Environments enables malware detection to be offloaded to a centralized Security VM to reduce the potential performance impact on Windows virtual servers. **Licensed per virtual server, with entitlement to the Sophos for Virtual Environments alternative deployment option included with all Sophos Server Protection licenses.**

Support for Windows servers on VMware ESXi and Microsoft Hyper-V

Features include:

- Off-board malware protection to a centralized Sophos Security VM
- Lightweight guest Virtual Machine Agent, infrequent updates
- Memory-resident malware detection
- Automated Threat Cleanup
- Prevent update storms and scan storms
- Windows Security Center integration
- Visibility of connected guest VMs (Sophos Central only)
