

SOPHOS

Security made simple.

Sophos Email

Protect and manage your email with Sophos Central

Sophos Email is a secure email gateway engineered to keep businesses safe from all email threats. It simply stops spam, phishing, malware and data loss and keeps your people productive. And if you want to consolidate protection it lets you control email security alongside endpoint, mobile, web, and wireless protection from Sophos Central's single interface.

Highlights

- ▶ Support for all major platforms
- ▶ Uses advanced multi-layer spam detection
- ▶ Blocks targeted spear phishing attacks
- ▶ Protects users from new zero-day threats
- ▶ Anti-spoofing alerts
- ▶ Automatic Active Directory Synchronization
- ▶ Self-Service Portal allows end users to manage their protection
- ▶ Ensures email continuity with spooling and emergency inbox

Instant proven protection

Sophos Email works right out of the box with all major email platforms including Microsoft Exchange, Office 365 and Google G Suite. Our default settings, giving you instant protection for your mailboxes by intercepting all email containing suspicious content, attachments or URLs. Sophos Email uses the latest anti-malware and phishing-detection technology that constantly updates to detect the latest threats.

Simply secure Microsoft Exchange, Office 365, and G Suite

Shifting your email to the cloud doesn't mean you have to reduce your security. Securing your email server or service with Sophos Email ensures you get trusted email security powered by the SophosLabs global network. And, you get the reassurance of continuity in the event of disruption to Microsoft or Google services.

Say goodbye to spam and unwanted mail

Sophos Email filtering blocks 99% of unwanted email at the gateway and our anti-spam engine catches the rest, including the latest phishing attacks and malicious attachments – quarantining where required. Live updates by SophosLabs power Sophos Email filtering, ensuring you're protected from the thousands of new threats sent every hour.

Ensure your email is always on

When your email server experiences an outage or there's a disruption to a cloud-based service, Sophos Email automatically queues all incoming mail until the server comes back online. When the service comes back online, all queued mail is delivered, safe and sound. You get automatic alerts, spooling to ensure no mail is ever lost, and an emergency inbox to keep your users productive.

Reporting on-demand

Simplify your life and view email security status alongside endpoint, mobile, web, and wireless in Sophos Central. Our mobile-optimized portal allows email administrators to view dashboard summary information at a glance, or drill down into more detailed reports covering emails scanned, as well as viruses and spam detected.

Sophos Email

Empower users

Free your IT team from user requests – the end user portal lets users access the emergency inbox, setup allow and block lists and release quarantined mail on demand. In-message quarantine digests go further, providing a daily summary of quarantined mail, with the option to release email direct from the inbox.

Sophos Email is part of Sophos Central

Simplify your life with a single pane-of-glass for all your security. Sophos Central lets you manage email alongside endpoint, web, wireless, and more all through a single, unified console. You get a single up-to-date, Sophos-hosted platform that's simple and intuitive. Find out more at sophos.com/central.

Simple, effective management

We've optimized all the daily workflow routines, not only making them intuitive, but also by streamlining the whole process. A simple slide bar lets you set the content filtering threshold. You are never more than a few clicks away from adjusting a policy or running a report.
