

Sophos Protection Suite —Enterprise

Everything you need, all from one vendor

- ▶ Combines endpoint, email, web and data protection—all in one license—to give you the best threat protection across all points and platforms
- ▶ Layered data protection with full-disk and email encryption, device and content control at the endpoint and gateway
- ▶ Uses the same engine across all platforms and points including desktops, laptop, SharePoint and Exchange servers, as well as the email and web gateways
- ▶ Includes our new Web Filtering in Endpoint, giving you full visibility and control of web activity in our endpoint agent.
- ▶ Delivers Patch Assessment that identifies, prioritizes and scans for critical threat-related security patches.
- ▶ Provides easy switching and deployment tools, active threat and data protection intelligence, real-time dashboards, intuitive management consoles, role-based administration and wizard-driven policy tools
- ▶ Gives you global and fully-integrated threat analysis, covering the complete range of evolving threats—web, spam, malware, viruses and more
- ▶ Includes 24-hour **certified expert support**, one-on-one assistance, anti-malware updates and product upgrades

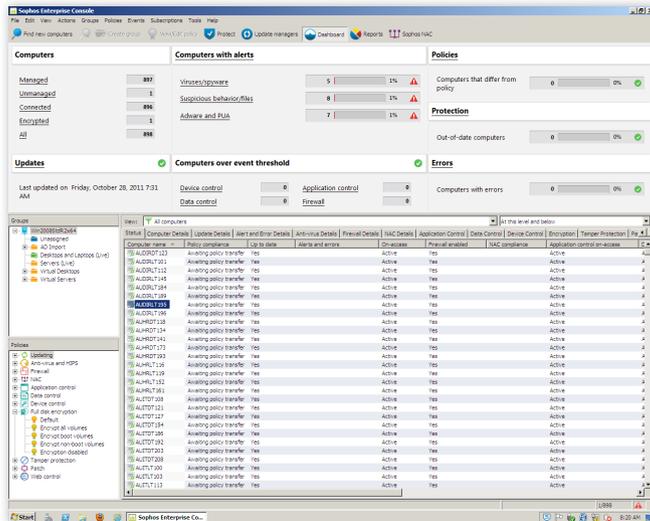

With our Sophos Endpoint Protection—Enterprise suite, you get malware, data protection and encryption for your desktops and laptops, plus email and web protection across your network.

It's absolutely everything you need in one neat bundle. All from one trusted vendor. All at a low cost.

Ideal for ...

Sophos Endpoint Protection—Enterprise is ideal for organizations of any size needing complete protection that's easy to manage.

Protect Windows, Mac, Linux, UNIX and virtualized platforms—all from one console.

Endpoint: Block threats, not productivity

We give you everything you need to stop malware and protect your data in one console and agent. It's fast, effective and complete security for your users, wherever they are.

Detects and removes viruses, spyware, rootkits, Trojans, adware and potentially unwanted applications (PUAs). Independent testers say it's the most effective threat detection of any major vendor.

Minimizes the impact on computer performance with our single scanning engine that independent tests rate as the fastest of any major security vendor—[now even faster in Endpoint 10](#).

Protects your Windows, Mac, Linux, UNIX and virtualized systems from one management console.

Stops new threats with live checks against our reputation database.

Our new Web Filtering in Endpoint gives you full visibility and control of web activity—[learn more](#).

Includes DLP that lets you control the movement of sensitive information.

Blocks unwanted applications with an application control list we maintain so you don't have to.

Provides device control so you can easily set rules for using removable storage devices.

Scan computers for missing patches. Our Patch Assessment identifies, prioritizes and scans for critical threat-related security patches—[learn more](#).

Includes network access control that checks computers for security compliance, updates policies and cleans up threats.

Centrally deploys small and frequent updates—now up to 41% faster than our last major upgrade—without affecting network bandwidth and system performance.

Email: Complete security and data protection

Stopping unwanted and malicious email from getting into your inbox while preventing confidential information from leaking out is simple. We provide end-to-end security across the entire email infrastructure, with hands-off and easy-to-use software.

Our software stops inbound threats, including spam, phishing attacks, spyware and malware, quickly and effectively.

Protects sensitive data with automatic email encryption and pre-packaged DLP definitions - reducing your risk of data loss

Configurable policies give you the control you need to enforce acceptable email use. Know you're in compliance with legal and regulatory requirements.

Web: Complete web security and control

Combining the best of the gateway, endpoint and cloud to provide better web protection everywhere.

Advanced web threat protection catches even the most advanced zero-day threats without latency or performance impacts.

Protection from malicious sites with our unique Live URL filtering to determine in an instant, if a site is nasty or nice, before allowing access.

Productivity management across all site categories ensures all your users are compliant and protected—on the network or off.

Real-time insights and rich reporting makes sure you have immediate visibility into all your user's activity on the web.

Encryption: Proven and certified

Our encryption protects data on the hard drives of both PCs and Macs. Encrypt files saved to removable storage devices and attached to emails. Best of all, this easy-to-implement technology helps you quickly meet your compliance needs while keeping your budget intact.

Protect your data with full-disk encryption technology.

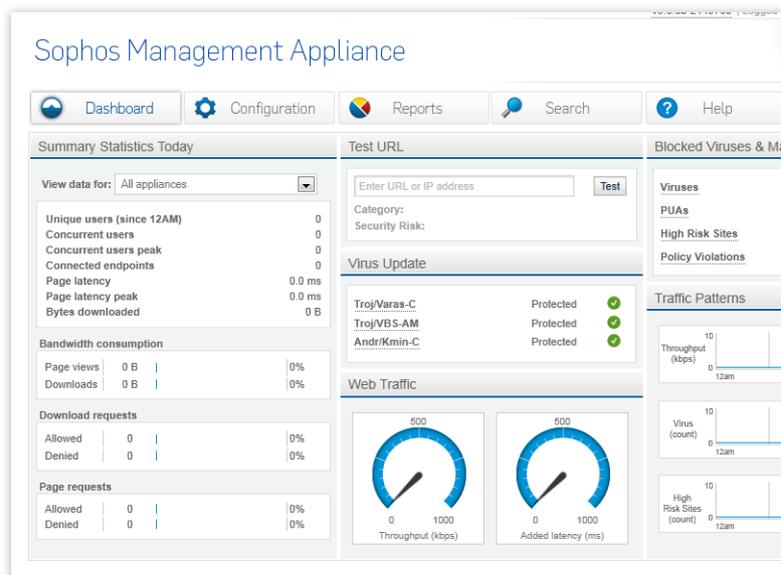

Automatically supports Opal self-encrypting drives, and applies our award winning software encryption to all of your other computers.

We generate keys from the password, reducing the risk of storing enciphering keys on disk.

Quickly and easily implement your data security policy with our easy-to-use configuration wizard.

Install directly to individual computers or automatically to all computers across your network.

The simplified management and rich reporting of our Web Security and Control give you control and visibility of user's activity on the web.

All in one license

One license includes complete threat and data protection across all platforms at the endpoint, email and web. Plus 24/7 support and free updates. Your Sophos Protection Suite license includes:

Sophos Endpoint Protection—Enterprise

- Scans computers for critical patches to stop malicious threats
- Antivirus protection for all the platforms you need
- Web protection for your users—everywhere
- Control applications, devices and who's on your network
- Integrated data loss prevention is part of the package
- Simplified, automated security management

Sophos Email Security and Data Protection

- We've got you covered against spam, malware and data loss
- Protect your sensitive email with integrated encryption
- Configurable policies help you control email use and ensure compliance

Sophos Web Protection Suite

- Manage everything with a simple, web-based management console
- Block all current threats, like malware, spyware, adware and phishing
- Get a handle on anonymizing proxies and filter encrypted traffic
- Website filtering on your computers for when users are off your network

SafeGuard Disk Encryption

- Protect your data with our proven full-disk encryption technology
- Easily deploy and manage encryption within our Endpoint console—coming second quarter of 2012
- Recover data fast with a full set of recovery and repair tools
- Single sign-on and local self-help for password recovery make encryption simple

Sophos PureMessage for SharePoint

- Antivirus protection for your Microsoft SharePoint servers

Sophos PureMessage for Exchange

- Antivirus and anti-spam protection for your Microsoft Exchange servers

Languages Supported

English, French, German, Italian, Japanese, Spanish, Simplified and Traditional Chinese. However, not all language support is available on all components and platforms.
