

# SOPHOS

Security made simple.

## Let's thrive in the security industry. Together.

Founded in 1985, Sophos is uniquely positioned as a leader in both Network and Endpoint security. With our OEM partners, we protect over 100 million users from malware and data loss. Some of the world's leading security brands and IT vendors including Cisco, FireEye, Trustwave, IBM, Bluecoat, Rackspace and more choose Sophos to build robust solutions. Sophos technologies lie at the very core of solutions deployed by over 100 ISVs, networking, telecom and wireless equipment vendors. With proven expertise in developing best-of-breed interoperable technologies, Sophos helps simplify business.

### Recognized as an industry leader

### What makes Sophos a global OEM market leader

#### OEM made Simple

Comprehensive OEM security solutions that seamlessly integrate with your existing solutions. Flexible commercial and licensing options tailored to match your business model.

#### SophosLabs

SophosLabs investigates edge cases, monitors trends and tunes our products for ever better protection. And, with Live Protection and Live Anti-spam, you benefit from all our data and analysis in real time.

#### Award-winning support backbone

Support delivered 24/7/365 by fully trained engineers to maintain high customer satisfaction.

#### Flexibility and expertise

Transform your business with seamless integration provided by a comprehensive set of SDKs, a variety of deployment options and specialist technical account managers.

#### Training and marketing

Access to resources for joint marketing, sales and PR activities. Technical and sales training to help your teams and provide better support to your customers.

### World-leading IT brands leverage Sophos OEM solutions

## OEM Technologies from Sophos

### Sophos Anti-Virus Engine

Take advantage of the same engine that powers award winning Sophos security products; detects viruses, trojans, worms and spyware. Full anti-virus engine with C/C++ API, Daemon/ service API with support for ICAP and other protocols, and broad platform support.

### Sophos Cloud Sandbox

Sophos Sandbox is purpose-built to deliver next-generation threat detection with advanced emulation tools and automated malware analysis. Available via powerful cloud APIs, it eliminates costly investments in R&D and advanced threat intelligence infrastructure. Available as an OEM package, it enables ease of integration, rapid on-boarding, and unrivaled support for OEM partners.

### Sophos Anti-Spam Engine

Detects and blocks latest phishing scams, snowshoe spam, identity theft, password scams and more by looking for suspicious content or message characteristics.

### Sophos Data Loss Prevention (DLP) Engine

Detects threats to mission-critical data and protects against data leakage. Supports data structures provided by SophosLabs as well as custom formats; boosts protection efficiency with Sophos Anti-virus in a single pass.

### Sophos Threat Intelligence

Enables improved awareness of malicious activity; an easy to implement additional layer to your security solution; gain visibility into infected domains/webpages, spammers/botnets, C&C/C2 sites using various attributes like IPs, domains, URLs, malware file checksums and more.

## Accelerate Success

Implement solutions across a range of industries and meet unique customer needs with Sophos OEM products embedded in your solutions.
