

Sophos PureMessage for Lotus Domino

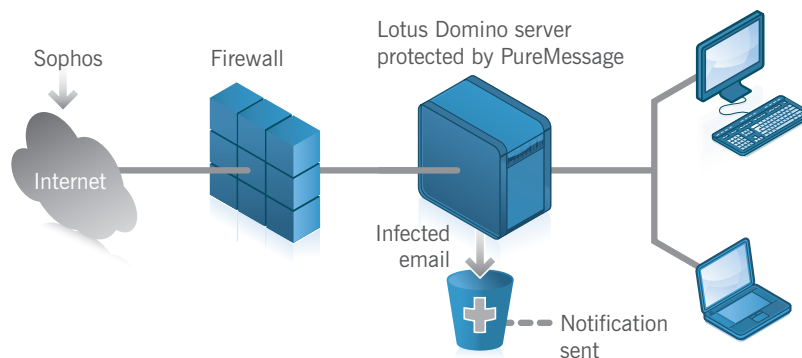

Sophos PureMessage for Lotus Domino protects Domino 7 and 8 servers against malware, spam and data leakage. It scans inbound, outbound and internal mail with advanced content monitoring and filtering capabilities covering keywords and file types. Its flexible deployment and extensive policy capabilities can be customized to suit a wide range of email management needs.

Award-winning anti-virus protection

- The PureMessage anti-virus engine detects and disinfects all email-borne viruses, spyware, Trojans, and worms.
- Behavioral Genotype® Protection protects against unknown threats by analyzing the behavior of a file before it executes.
- Genotype® virus detection technology protects against families of viruses even before specific detection is available.

Comprehensive anti-spam technology

- Sender Genotype uses reputation filtering and proactive botnet detection to protect against known and unknown spam sources, effectively eliminating up to 90 percent of spam.
- A range of anti-spam techniques including obfuscation detection, URL tracking, heuristics, and content fingerprinting eliminates more than 99 percent of spam.
- Sophos SXL technology, which provides real-time spam intelligence, protects against the latest spam campaigns including phishing attacks.

Sophos PureMessage for Lotus Domino provides integrated spam and virus protection and Domino 8 support

Key benefits

- » Detects over 99 percent of spam including phishing attacks
- » Detects, disinfects, deletes or quarantines viruses, spyware, Trojans, and worms in incoming, outgoing and internal email
- » Provides powerful content and attachment scanning to protect against confidential information leakage
- » Supports Domino 8 servers
- » Ensures that only allowed file types enter the network even if disguised.
- » Employs Genotype technology to catch evolving spam campaigns and new virus variants
- » Blocks unknown threats proactively with Behavioral Genotype technology
- » Provides real-time anti-spam protection with Sophos SXL
- » Provides proactive botnet detection and reputation filtering with Sender Genotype, which blocks up to 90 percent of spam
- » Incorporates a flexible policy environment to support complex security or compliance requirements
- » Updates automatically with the latest protection from SophosLabs
- » Provides end-user quarantine review, allow lists, and block lists
- » Enables customized email management and reduces workload through delegated administration
- » Includes 24x7x365 support for the duration of the license and Sophos can be contacted for one-to-one assistance at any time

Flexible data leakage prevention and policy control

- True file type detection gives reliable control over attachments by ensuring that executable files that have been disguised as innocent files, such as jpegs or word processing documents for instance, are identified and blocked.
- Messages and attachments are scanned for specific keywords, phrases and patterns.
- You can create custom disclaimers for outbound email from different groups or users.
- Administrators can assign different policies to individual groups and users, ensuring that an organization's acceptable use policy enforced.

Simplified, customizable administration and control

- A Domino-based console enables centralized administration across multiple servers, providing automated quarantine management, message tracing, and reporting on email traffic and threat activity.
- Role-based administration allows the master administrator to assign rights and privileges based on organizational need. These can relate to policy, quarantine, groups, separate companies, and departmental sub-administrators.

Industry-leading expertise

- Our 24x7x365 customer support is included as standard and provides unlimited access to our highly acclaimed customer support team, while SophosLabs™ – our global network of threat analysis centers – provides a rapid response to emerging and evolving threats.

Languages available

- English.

PureMessage for Lotus Domino comes in two versions with separate pricing structures:

- Anti-virus only.
- Integrated anti-virus, anti-spam and content filtering.
